ARCHIE COOK

PROFILE

Archie is a highly motivated Cyber Security graduate with a strong work ethic and a flexible, hands-on attitude. Having recently completed his third year of a BSc (Hons) in Cyber Security at Bath Spa University with a 2:2, he is working towards a long-term career in ethical hacking and penetration testing.

Alongside his studies, Archie has gained valuable real-world experience in fast-paced hospitality and customer-facing environments. From managing responsibilities under pressure as free-pouring bartender to handling sensitive customer data in call centre and betting shop roles, Archie brings reliability, professionalism, customer-first and security-based mindset to every role he takes on.

Archie is currently a director of his own business AJWC Tech Consulting LTD. Archie makes Oracle Fusion training videos for his client, and developed his own website to showcase his portfolio of work:
https://www.ajwctechconsulting.com
Alongside starting his company, Archie is working towards obtaining an OSCP certification. Completing HackTheBox and TryHackMe Labs/CTFs. During university, many ImmersiveLabs have been completed for offensive and defensive security. Navigate to the website for further links!

EXPERIENCE

AUGUST 2025 - DECEMBER 2025
LEAD WEB DEVELOPER @ (WWW.SCOUTNONLEAGUE.COM)
Archie was hired as a freelancer with the scope of work: Design, build, and deliver the clients website according to the agreed specifications. Integrate and configure subscription and payment systems. After launch, manage and operate the entire website on behalf of the client which includes - Monitoring website reliability and uptime. Applying updates, fixing bugs and errors, keep website secure and backed up. Maintaining full responsibility for the websites cyber security, including safeguarding against hacking, data breaches, malware, and other cyber risks, and implementing industry-standard practices.

MAY 2023 - JAN 2024
BARTENDER @ THE BOTANIST BATH
Archie worked as a part-time Bartender for The Botanist in Bath during the summer holidays, He was trained to build cocktails, make coffees, pour pints, and work on an extremely busy bar, this also involved cleaning up and closing down the bar and barback till 2-3am in the morning and doing other various tasks such as restocking ice, changing the kegs of beer and cider, ensuring there's enough stock and if not then informing colleagues that they are out, cutting garnish for cocktails, making sure the bar is clean and there's no cross contaminates which are all to be completed to ensure the guests have the best customer experience.

JULY 2022 - DECEMBER 2022
CUSTOMER SERVICE MANAGER @ LADBROKES
Archie worked as a Customer Service Manager at Ladbrookes to supplement his University Loan. During his six months he put into practice security measures whilst managing large amounts of money counting cash from tills and slot machines. He was customer facing taking and paying out bets. Archie left the job as he felt that gambling showed the worst in people and decided that there were other avenues to jobs he wanted to explore.

OCTOBER 2020 - SEPTEMBER 2021
CALL AGENT FOR DHSC IAS AND NHS T&T WITH SITEL
Archie worked from home as a call agent for DHCS (Department of Health and Social Care) . He was trained to deal with tier 3 contact tracer, ISO Follow Up and IAS (International Arrivals Service) making up to 200 calls per day. This developed his telephone skills to ensure that his manner was professional, friendly and efficient as well as maintaining records at the end of each call. He was expected to escalate certain calls when necessary to his supervisor for those breaching isolation legal requirements. His initial contract was extended many times till Oct 31st 2021 however I left in Sep 2021 to go study at Bath Spa University.

MAY 2020 - OCTOBER 2020
WEB DEVELOPMENT AND DATA ENTRY
Archie worked as a sub-contractor for STEL as a web developer. Using Magento (Open-Source e-commerce platform) he used a number of tecniques to change and investigate files written in PHP, HTML5, CSS, JavaScript and MySQL. He also used excel skills to sort and import product and catalog data for their development and production site. Identified and rectified missing data (images, items, customers), bugs and errors.
